About Me

I am Omar and I am a web developer. I have over 5 years of experience working as both solo freelance web developer and team member. I have worked with people around the globe including USA, Canada, UK, Australia, etc. I love building websites, securing them, make them fast and I love to provide customers with excellent support.

Professional Experience

Web Developer | Itersi LLC
2022 - Present

Key responsibilities:

- Building websites using Elementor.
- Providing clients with Elementor training.
- Provide server, domain and website services to clients
- Convincing clients to take maintenance / care plans
- Supporting clients when they need support

Freelancer
2018 - Present

Key responsibilities:

- Looking for clients online
- Bidding for jobs
- Work as webmaster
- Work as web developer
- Debugging and fixing issues

Software Engineer | Echologyx
2019 - 2020

Key responsibilities:

- Worked as part of Research and Development Team.
- Our designer team would design different variations of any web page for our client company, then our designer team would handover those designs to engineers like myself so that we could implement them to the actual website.
- Writing vanilla JavaScript and CSS (DOM manipulation) and putting the code to an A / B test software like Optimizely that is attached with the particular website.

Achievements
